

LIFT

LIFTMASTER QUADRO PRO

The new vacuum lifting device from the Liftmaster Quadro series sets new standards in vacuum lifting technology. Its innovative operating concept, the quick battery exchange and the high safety standards make the lifting systems reliable mounting aids for indoor and outdoor applications. They are used together with overhead and mobile cranes. Four optional extension arms complement the modular construction of the devices and increase its flexibility in use.

FEATURES

- Suction pads diameter of 360 mm
- Load capacity per suction pad 100 kg
- Digital outdoor temperature display
- Warning system with 4 signal lamps
- 2 batteries included
- TÜV approved
