

LIFT

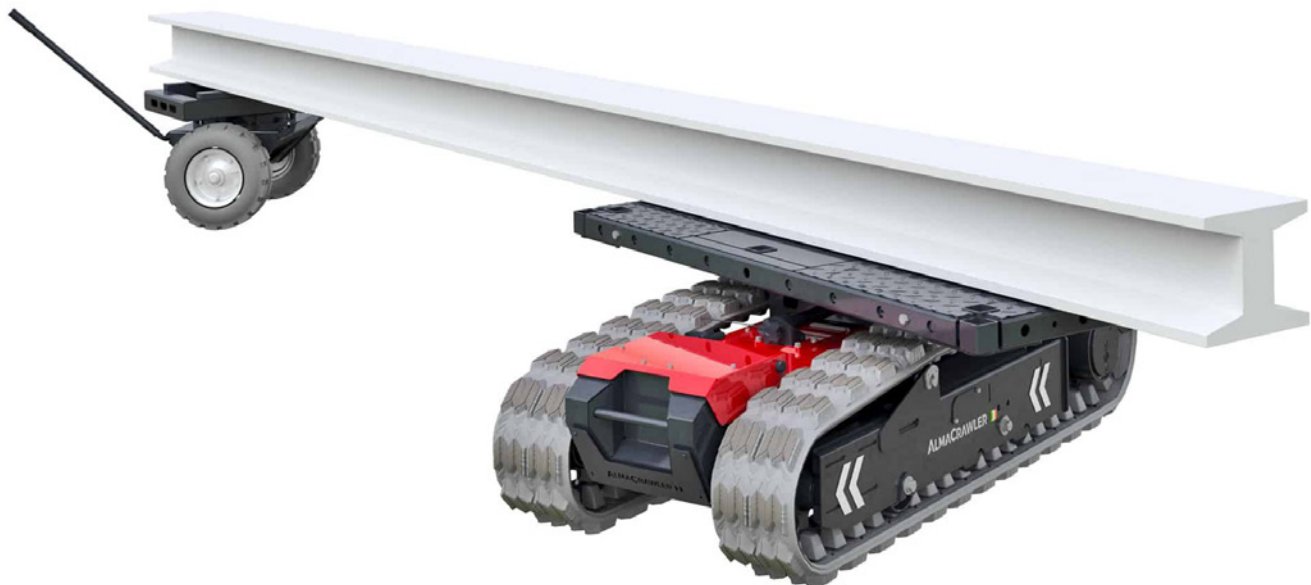

ALMA 2 WHEELED DOLLY WITH TURNTABLE

This Dolly Kit is a heavy-duty load support accessory designed to safely transport long or oversized materials when using the 1.5 FX & 3.0 FX tracked carriers in restricted or rough-terrain environments. With a maximum capacity of 1500kg, this robust extension provides additional support for loads that exceed the standard platform length, making it ideal for handling materials such as steel beams, timber lengths, concrete posts, and other elongated components commonly used across construction, civils, and infrastructure projects.
