LIFT
RACELIFT

The RACELIFT is a manoeuvrable 1-man glass mounting device for doors, windows, glass, metal and wood on the construction site. With the versatile mounting device, the transport of components is a breeze. With 1-man components can be lifted up to 80 kg and with 2-man even up to 150 kg and lowered.

Its non-slip handles are adjustable in height and length and with the PU tires (ø 300) can be safely driven on rough terrain. The RACELIFT can be easily and quickly disassembled into 6 parts and fits into any trunk.
